

NovaTech Refund Policy 2026

Overview

NovaTech Systems provides refund eligibility for software subscriptions, hardware products, and enterprise support contracts.

Refund approval depends on purchase type, region, account tier, and product condition.

Refund requests submitted through unofficial channels are automatically rejected. Refunds are processed only after invoice validation and customer identity verification.

Standard Customer Refunds

Standard customers may request refunds within 30 calendar days of the original purchase date.

Refund eligibility conditions:

- Product must not show physical damage caused by misuse.
- Subscription services must not exceed 40% consumption.
- Digital activation keys become non-refundable once redeemed.

Approved refunds are processed to the original payment method within 5 to 7 business days.

Enterprise Customer Refunds

Enterprise customers are eligible for extended refund windows up to 45 days depending on contractual agreements.

Enterprise refund requests require:

- procurement verification
- enterprise account validation
- approval from the account success manager

Enterprise clients operating under annual contracts may receive service credits instead of direct financial reimbursement.

Regional Exceptions

European Union customers are protected under regional digital consumer regulations and may request subscription cancellation within 14 days even after activation if usage remains below the fair-use threshold.

Customers located in India must complete bank account verification before high-value refunds exceeding INR 50,000 are approved.

North American enterprise clients may receive partial reimbursements for SLA violations during critical outages.

Rejected Refund Scenarios

Refunds are rejected under the following conditions:

- deliberate hardware damage
- account-sharing abuse
- fraud investigations
- repeated refund exploitation
- expired enterprise agreements

Refund abuse automatically flags accounts for manual review by the NovaTech Risk Operations team.
